

BME/MSE 410 Design and Applications of Biomaterials

Semester: Fall, 2017

Days/Times: Monday/Wednesday 10.00-11:30 AM

Classroom: 133 Chrysler

Professor: Geeta Mehta, Ph.D.

Depts. of Materials Science and Engineering, Biomedical Engineering, and Macromolecular Science and Engineering

Office: 3044W Building 28, NCRC (my office is in Building 28 of NCRC, there are campus buses that go to NCRC, and on foot it is ~15 minutes walk from the Duderstadt Library)

Office Hours: Immediately after class or via E-mail

E-mail: mehtagee@umich.edu

GSI: Michael Bregenzler

Office Hours: TBD (After polling)

Sending Emails: Use [BME 410] in the subject line. Copy both Dr. Mehta and Michael Bregenzler

Prerequisites: One year of general biology or biochemistry and MSE 220 or 250.

Textbook: Ratner, B. D.; Hoffman, A. S.; Schoen, F. J.; Lemons, J. E., 3rd Eds, *Biomaterials Science: An Introduction to Materials in Medicine*, Elsevier Academic Press, 2012.

ISBN :9780123746269 eBook ISBN :9780080877808

(Book is available online via UMich Library:

<http://mirlyn.lib.umich.edu/Record/012216410>

<http://www.sciencedirect.com/science/book/9780123746269#ancS2>

Pertinent Chapters from Ratner are posted on Canvas)

Course website: <https://ctool.umich.edu/>

Useful Websites: • NIH Public Medline: <http://www.ncbi.nlm.nih.gov/PubMed/medline.html>

• The Web of Science Citation Index:

<http://isi10.newisiknowledge.com/portal.cgi>

(need to use from on campus or with your umich uniqueness and password)

Accommodations for Students with Disabilities:

If you think you need an accommodation for a disability, please let me know at your earliest convenience. Some aspects of this course, the assignments, the in-class activities, and the way we teach may be modified to facilitate your participation and progress. As soon as you make me aware of your needs, we can work with the [Office of Services for Students with Disabilities \(SSD\)](#)

to help us determine appropriate accommodations. SSD (734-763-3000 or ssd.umich.edu) typically recommends accommodations through a Verified Individualized Services and Accommodations (VISA) form. I will treat any information you provide as private and confidential.

I. Course Goals

- 1) Development of global perspective of interdisciplinary issues (biology, materials science, chemistry, and engineering) involved in biomaterials.
- 2) Learn how to design, synthesize, evaluate, and analyze biomaterials.
- 3) Critical thinking and analysis.
- 4) Communication of ideas; communication to coordinate work
- 5) Familiarization with biomaterials literature.

Structure of Lectures

1. Materials (Lectures 1-2)
Bulk properties and surface properties
2. Class of materials used in biomedical applications (Lectures 3 - 12)
3. Biological interactions with materials (Lectures 13 - 27)
Proteins, cells, and tissues
Biological responses: Inflammation, immunity, toxicity, coagulation, tumorigenesis.
Biofilms, Pathological calcification, Biocompatibility
4. Applications of biomaterials (All throughout the course): drug delivery, tissue engineering, cardiovascular, orthopedic, dental, functional tissues, etc.)

II. Grading

- (a) Midterm exam: 30% of grade
- (b) Homeworks: 20% of grade
- (c) Quizzes/Class Participation: 10% of grade
- (d) Final Exam: 40% of grade

III Exams: Exams will be split between short-answer type questions and quantitative problems with opportunities for partial credit. Important concepts that might appear on exams will be highlighted in each lecture.

For the midterm and final exams, I will allow 1 side of 1 cheat sheet (8.5x11 inch) (include name neatly on the blank side) turned in with your exam. This will be used to perform learning analytics and determine the course concepts and topics that you might need more help with.

Final Exam prep: There will be an overall review session before the final exam.

Final exam will be cumulative.

IV Homework

HWs discussion with other students in the class: You may discuss HWs with your classmates (it is expected), and work towards solutions together. You must submit individual work that is not

a verbatim copy of any other student's work. Do not forget that even when working in groups, you are individually responsible for your learning.

HWs will be collected by the GSI each time they are due, at the beginning of the class.

Late HW Policy:

Same day late HW: 15% deduction

Next day late HW: 50% deduction

Third day late HW: 100% deduction

V Quizzes/Class participation: To ensure active learning and engagement in class, we will be using the iClicker system in lectures. Your personal iClicker must be registered under your username and UMID. Your responses to in-class questions will be recorded via iClicker, and these will go towards your participation points.

We will also conduct active learning exercises during each class. Your participation is essential for these activities, and will count towards your participation points.

VI Course Evaluation: Your feedback is extremely important to make this course better and to improve your learning experience. To encourage course evaluation, I will be awarding extra points:

- If more than 90% of the class completes the final class evaluations, 5 points (from the class participation points) will be awarded to all students.
- With your last homework assignment, staple a receipt of your course evaluation, and you will be awarded an extra 2 points towards your homework points.

Please note that the course evaluations are anonymous and the final evaluations aren't available to me until after your final course grades have been submitted.

VII Journal relevant to Biomaterials (selected ORIGINAL ARTICLE for the Scientific Literature Oral Presentation must be from 2012 or newer)

- Minimum you should browse through

Nature

Science

Nature Biotech

Nature Materials

Nature Communications

Proceedings of the National Academy of Science USA (PNAS)

Biomaterials

Scientific Reports

Nature Biomedical Engineering

Science Advances

Tissue Engineering: Part A, Part B, Part C

Journal of the American Chemical Society (JACS)

European Cells & Materials (eCM)

Lab on a Chip
Nanomedicine
Soft Matter
Journal of Biomedical Materials Research Part A

- Others (just some examples, there are more, See Appendix D in Textbook)
Advanced Materials, Advanced Functional Materials, Analytical Chemistry, Annual Review of Biomedical Engineering, Biomacromolecules, Small, Acta Biomaterialia, Cell, Critical Reviews in Biocompatibility
Critical Reviews in Biomedical Engineering
Journal of Biomaterials Science: Polymeric Biomaterials
Journal of Biomedical Materials Research, Journal of Controlled Release
Journal of Long Term Effects of Medical Implants
Journal of Materials Science: Materials in Medicine,

IX Honor Code Statement: All students in the BME/MSE/Macro 410 are presumed to be decent and honorable, and as such, are bound by the College of Engineering Honor Code. You may not seek to gain an unfair advantage over your fellow students; you may not consult, look at, or possess the unpublished work of another without their permission; and you must appropriately acknowledge your use of another's work. Any violation of the honor policies appropriate to each piece of course work will be reported to the Honor Council, and if guilt is established penalties may be imposed by the Honor Council and Faculty Committee on Discipline.

X. Course Outline

#	Date	Topic	Reading	Homework
1	September 6 (Wed)	Orientation and Introduction to Biomaterials	Ratner: pp xxv to xxxvii, xli-lii	
2	September 11 (Mon)	Material Properties, Surface Characterization	Ratner: pp 9-19, 34-53	
3	September 13 (Wed)	Surface Characterization and Polymers	Ratner: pp 34-53, 63-109	
4	September 18 (Mon)	Polymers and Hydrogels	Ratner: pp 63-109, 166-176	HW#1 Due
5	September 20 (Wed)	Polymers and Hydrogels	Ratner: pp 63-109, 166-176	
6	September 25 (Mon)	Hydrogels, Smart Polymers	Ratner: pp 166-176, 247-255	
7	September 27 (Wed)	Medical Fibers and Biotextiles, Biodegradable materials	Ratner: pp 301-319, 179-193	
8	October 2 (Mon)	Biodegradable materials, Natural materials	Ratner: pp 179-193, 195-206	HW#2 Due
9	October 4 (Wed)	Natural materials, Surface Modification	Ratner: pp 195-206, 259-273	
10	October 9 (Mon)	Surface Patterning, Metals	Ratner: pp 276-296, 111-119	
11	October 11 (Wed)	Metals, Ceramics and Glasses	Ratner: pp 111-159	
	October 16 (Mon)	STUDY BREAK		
12	October 18 (Wed)	Composites, Pyrolytic Carbon, Porous materials	Ratner: pp 223-237, 209-221, 321-329	HW#3 Due
13	October 23 (Mon)	Cells, Stem Cells, Cell injury response	Ratner: pp 427-451, 487-494	
14	October 25 (Wed)	MIDTERM EXAM During class hours	Lectures 1-13	
15	October 30 (Mon)	Proteins on biomaterials	Ratner: pp 394-407	
16	November 1 (Wed)	Proteins on biomaterials, Non fouling surfaces	Ratner: pp 394-407, 241-246	

17	November 6 (Mon)	Cell/tissue biomaterial interactions, Cells and surfaces	Ratner: pp 408-422, 452-473	HW#4 Due
18	November 8 (Wed)	Biological response to biomaterials	Ratner: pp 499-503	
19	November 13 (Mon)	Inflammation and immunity	Ratner: pp 503-512	
20	November 15 (Wed)	Innate Immunity	Ratner: pp 512-519	
21	November 20 (Mon)	Adaptive Immunity	Ratner: pp 519-532	HW#5 Due
22	November 22 (Wed)	Toxicity, Hypersensitivity, Tumorigenesis	Ratner: pp 545-550, 558-563	
23	November 27 (Mon)	Clotting and Unclotting, Blood-Material interactions	Ratner: pp 551-557, 617-633	
24	November 29 (Wed)	Biofilms	Ratner: pp 565-579	
25	December 4 (Mon)	Pathological Calcification	Ratner: pp 739-750	HW#6 Due
26	December 6 (Wed)	Biocompatibility, Biological testing of biomaterials	Ratner: pp 587-616	
27	December 11 (Mon)	Overall Course Review		
	December 18 (Mon)	Final Exam 1:30 pm - 3:30 pm
